

Project Name	NV800 Ozone Test
Laboratory Name	Intertek
Laboratory Location	3933 US Route 11, Cortland, NY 13045
Date	June 23, 2016
Device Tested	NV800
Objective	To determine the peak ozone location and measure ozone concentration.
Methodology	Ozone Testing was conducted in accordance to the Standard UL 867 Section 40.
Summary of Results	<p>PASS - Steady-state conditions were reached within 8 hours with maximum ozone concentration measured of 0.017 ppm by volume on the high fan speed setting and 0.020 ppm on the low fan speed setting.</p> <p>The maximum allowable ozone concentration is 0.050 ppm</p>
