PLASMA AIR - MODEL 7000

IONIZATION PRODUCT SUBMITTAL

The Model 7000 is a needle point type ionizer producing an equal amount of positive and negative ions. The unit can be installed in metal duct utilizing the pre-drilled flange and factory applied gaskets. The contractor makes a duct cut out and secures the unit with self tapping sheet metal screws. The ionization output protrudes 1½ inches into the duct to clear any duct liner. The unit can also be installed inside an HVAC unit utilizing a contractor supplied mounting bracket. The ionization needles are recessed to avoid electric shock, dust buildup and premature failure. The ionization unit can directly accept power from either 24V AC fan control circuit or a 12V DC pin from a power supply.

POWER INPUT OPTIONS (SELECT ONE):
- 24V AC input (standard) (7001)
- 120V AC to 12V DC wall pack (7002)
- 120V/240V AC to 12V DC power supply (7003)
- 241V/277V AC to 12V DC power supply (7004)
