

Equipment Leasing Program for Casinos

Quickly Benefit From the Most Reliable, Effective Casino Smoke Control System

Plasma Air now offers an equipment leasing program — the first of its kind in the industry. The leasing process is easy and can be customized for a variety of financial situations allowing you to acquire our solution quickly and when it is needed, instead of when capital is available. We can deploy the system quickly, typically within four to six weeks.

Plasma Air has been reducing odor complaints in casinos around the world for over a decade. As one of the premier indoor air quality experts, we are committed to providing innovative air purification solutions that tackle the most challenging indoor pollution environments.

To find out how we can work together to keep your business thriving please contact us at casino@plasma-air.com or 203.662.0800.

Benefits of Leasing Your Plasma Air Equipment

Conserve Capital

Sometimes the equipment needed to keep your casino profitable and operating effectively represents an investment that may not have been budgeted. By leasing Plasma Air's air purification system, your cash is not tied up in equipment equity, freeing up the capital you need for other projects.

System Maintenance is Covered 100%

Plasma Air will provide system maintenance throughout the life of the lease, including all tube cleaning and replacements. No need to worry about keeping up with a maintenance schedule, Plasma Air will do it for you.

Extension of the Product Warranty

Plasma Air will extend the product warranty for the life of the lease. Leases typically run either 36 or 48 months.

Flexible Programs

We work with you to choose the term, structure, and payment that fit your needs. Let us customize a lease structure to meet your financial requirements.
