

nano

The Nano is a medical-grade, airborne infection control device that inactivates aerosolized viruses, bacteria, mold spores and pollen within the breathing zone. The device uses one NanoStrike™ coil with a single speed fan. Easy to use, flexible in positioning, and quiet in operation, the portable device provides the safest and most cost-effective airborne pathogen protection in a continuous manner to an individual or a group of people occupying a shared space where social distancing guidelines cannot be followed.
